

THE VENDETTA

*Every match you've ever played is on the record.
Each event it names your enemy — and then keeps
score of the grudge, win or lose.*

WHO YOU FIGHT

You don't pick your rival. The record does.

Before each event the system reads your full match history and assigns you a **Vendetta** — the fiercest matchup it can find among the players in the room. It arrives in one of three grades.

SWORN RIVALS

You've clashed again and again. The history runs deep and the score is never settled.

BAD BLOOD

Some history between you — the best grudge available among today's field.

NEW BLOOD

No history yet. A fresh rivalry, drawn at random, waiting to be written.

HOW YOU SCORE

Every match you play is worth points.

One currency — **League Points (LP)** — and three lines of rules. That really is all of it.

Win a match

3

LP

Draw a match

1

LP

Lose a match

0

NONE

*Nothing else adds to your total — not the draw you were given,
not who you were paired against, and not beating your
Vendetta. Your score is yours alone.*

COUNT IT YOURSELF

One night, scored at your own table.

Five Swiss rounds, one of them against the rival you were handed:

ROUND 1

You win

+3

ROUND 2

You beat **your Vendetta** — the same 3 as any win

+3

ROUND 3

You lose

0

ROUND 4

You draw

+1

ROUND 5

You win

+3

YOUR NIGHT

10 LP

*Round 2 is the one everyone will talk about. It's also worth
exactly what round 1 was.*

THE FINE PRINT

Three things worth knowing.

× THE GRUDGE IS WORTH NOTHING.

Beating your Vendetta pays exactly what any other win pays — **3 LP**. What it earns you is the record: the head-to-head, the highlight, and the bragging rights until you meet again.

◇ NO RIVAL TODAY? NOTHING CHANGES.

Odd field, rival dropped, or you rolled in late — your score is untouched either way. The Vendetta decides the story, never the standings.

× BYES NEVER SCORE.

A bye isn't a fight. It earns no points and doesn't touch your record — for you or your rival. Only battles at the table move the board.

WHERE IT ALL LANDS

One board. One crown.

Every event adds to your season total — nothing resets, nothing decays.

GNL: VENDETTA

Ranked on League Points, with your match record beside it so you can see how a total was built.

Nothing about your rivalries appears here — that's the point.

LEAGUE PTS

Your season total, in LP.

RECORD

Wins, draws and losses at the table.

EVENTS

Nights you turned up and played.

Your Vendettas, your head-to-heads and every grudge you've settled live in your player page and the event reports — the league's memory, kept separate from its standings.

✂ May the best rival win ✂
